Grid GARDEN

Level 4 of 28

When pairing `grid-column-start` and `grid-column-end`, you might assume that the end value has to be greater than the start value. But this turns out not to be the case!

Try setting `grid-column-end` to a value less than 5 to water your carrots.

```
1 #garden {
2   display: grid;
3   grid-template-columns: 20% 20% 20% 20% 20%;
4   grid-template-rows: 20% 20% 20% 20% 20%;
5 }
6
7 #water {
8   grid-column-start: 5;
9   grid-column-end: 2;
10 }
11
12
13
14
```

Grid GARDEN

Level 5 of 28

If you want to count grid lines from the right instead of the left, you can give `grid-column-start` and `grid-column-end` negative values. For example, you can set it to -1 to specify the first grid line from the right.

Try setting `grid-column-end` to a negative value.

```
1 #garden {
2   display: grid;
3   grid-template-columns: 20% 20% 20% 20% 20%;
4   grid-template-rows: 20% 20% 20% 20% 20%;
5 }
6
7 #water {
8   grid-column-start: 1;
9   grid-column-end: -2;
10 }
11
12
13
14
```
